Call for Papers

Electronic Environment 2011, conference and exhibition for EMC, ESD, Electrical safety, Mechanical and Thermal Environments. April 5-6 2011.

The meeting place for YOUR electrical field!

Electronic Environment magazine again plays host to the only joint conference and exhibition in the Nordic countries covering EMC, ESD, Electrical Safety, Mechanical Environments and Thermal Environments.

Electronic Environment is a recurrent conference and exhibition for specific electronic fields. This is the meeting place for practicing technicians and engineers, persons in management and marketing, quality and development representatives, buyers, consultants and decision makers. All interested in EMC, ESD, Electrical Safety, Mechanical and Thermal Environment.

Electronic Environment 2011 is the meetingplace where the latest research and solutions are being presented. Where clients and suppliers meet to exchange experiences and good, creative ideas. It is where you will find well known companies and organizations. Where boundaries between academics, enterprises and governing bodies are bridged as well.

Electronic Environment is so much more than just a mere meeting place. Lecturers from all over Europe, giving seminars and presentations in several parallel venues, guarantees that you will learn about the latest research in your own subject area as well as others. You will also find the latest products and services in the exhibition space.

just event.

Call for Papers to Electronic Environment 2011 at Stockholmsmässan in Älvsjö, Sweden, on April 5-6, 2011

Now you have the opportunity once again to present your findings and experiences to a large and interested audience; at Electronic Environment, held at Stockholmsmässan in Älvsjö, Sweden, on April 5-6, 2011. Subjects are covering EMC, ESD and Electrical Safety, Mechanical and Thermal Environments.

Share your knowledge and experiences, spread new findings or forgotten wisdom. Inform on new regulations and standards. Raise awareness or debate. Discuss and exchange thoughts with colleagues, extend your fellow network and learn from the expertise of others.

We invite papers aimed for practicing technicians and design engineers, persons in management and marketing, quality supervision and authority representatives as well as test- and laboratory engineers, etc.

EMC: • *EMC in Reality – reports of real cases* • *Electrical and Hybrid Vehicles* • *Design for EMC* • *Industrial EMC* • *Marine EMC* • *RFI* • *Intentional EMC (IEMC)* • *High Power Microwave & High Intensity Fields (HPM & HIRF)* • *Testing & Testing Methods* • *Statistical Methods for EMC* • *Rules and Standards* • *The Way to Quality Declaration* • *Electromagnetic Fields – Limits and Verification Methods*

ESD: We are primarily looking for papers and workshops with practical orientation, and with focus on ESD-problems in environments where ESD traditionally has not been an issue: • *Who has ESD-problems?* • *Hidden ESD-problems in novel environments* • *Elimination of risks* • *Ignition Risks* • *Practical ESD*

Electrical Safety: • *Power Quality for Society and Industry* • *Information- and Communication Technology for Smart Energy Systems* • *Measuring Technology*

Mechanical and Thermal Environment: • *Multiphysics (thermal, thermomechanical, mechanical) Simulation And/or Experiments* • *Failure Analysis* • *Materials Characterisation* • *Experimental Validation of Simulation* • *Virtual Prototyping* • *Prognostics* • *Accelerated Testing* • *Life Time Prediction*

EMC, ESD, Electrical Safety: • Workshop and Discussion: Ground and Grounding with Equipotential Techniques

Submit abstract by 30 june 2010

Please submit a short abstract with headline to our program committee by June 30, 2010. Complete papers are due December 31, 2010. Further instructions will be included in a letter of acceptance, in October 2010. Papers may be in Swedish, Norwegian or English.

Speakers will receive:

- Full printed conference documentation
- Lunches, coffees and banquet dinner
- Free participation the day for lecture

We in the program committee hope to see and listen to you at this unique event!
Take the opportunity to show off and participate in keeping the level of knowledge up!

We welcome your abstract!
